

**Notice to**  
***Scott v. Samson Resources Company***  
**Settlement Class Members**

**Gas Vented, Flared, or Used as Fuel**

Settlement Class Members can determine the amount of gas used for lease fuel, flared, or lost before being sold by following these steps:

Step 1: Go to <http://wogcc.state.wy.us>

Step 2: Single click on “Wells”

Step 3: Single click on the logo labeled “By API Number”

Step 4: Type the last seven digits of the API number (after “490”) of the applicable well and click on “GoFind”. Samson will advise you of the API number for your wells if you make a written request for such number as described above.

Step 5: Single click on “Sales” in the upper right corner

Step 6: Subtract “Sales Gas MCF” from “Prod Gas MCF” for the applicable month to determine the volume of gas produced but not sold for that well
